Early Recovery Exercise Checklist

Daily exercise schedule to restore knee function

Rehabilitation Objectives

Perform these exercises 3 times daily. Quality of movement is key. Work within a comfortable range of motion; mild discomfort is normal, but sharp pain is a sign to stop.

1. Ankle Pumps

- Purpose: Prevents blood clots and improves circulation.
- Technique: Pull your feet up towards you, then push them down away from you.
- Frequency: 10-15 repetitions every hour while resting.

2. Straight Leg Raises

- Purpose: Strengthens the quadriceps muscles.
- Technique: Tighten the muscle on top of your thigh. Lift your leg 6 inches off the bed, hold for 5 seconds, then lower slowly.
- Frequency: 3 sets of 10 repetitions, twice daily.

3. Seated Knee Bends

- Purpose: Increases knee flexion (bending).
- Technique: Sit on a firm chair. Slide your foot backward under the chair as far as comfortable. Hold for 5 seconds.
- Frequency: 3 sets of 10 repetitions, twice daily.
